SMS settings

Microsoft-provided SMS and voice authentication is retiring February 1, 2027. Move users to passkeys or configure a customer-managed telecom provider to avoid sign-in disruption. [Learn more here.](#)

This authentication method delivers a one-time code via SMS to a user's phone, and the user then inputs that code to sign-in. [Learn more.](#)
SMS is usable for multi-factor authentication and Self-Service Password Reset; it can also be configured to be used as a first factor.
